
ACNE PATCH

For pimples, blackheads...

□ PRODUCT DESCRIPTION

Acne Patch is a clear patch indicated for correcting and removing fast the uncomfortable, anti-aesthetic blackheads and pimples that usually appear on the facial skin. Its occlusive action provides a deep efficacy.

The active ingredients of **Acne Patch** dissolve fat, control excess oil production and prevent the recurrence of pimples, blackheads and other skin blemishes.

□ INSTRUCTIONS

The patch is applied directly onto the pimple and allowed to act for 8 consecutive hours. A single application for 8 hours can correct the aesthetic problem. It is simple, discreet and extremely effective.

If necessary, repeat the application.

Tips on use:

Make sure that the area where the patch will be applied is clean and dry. Once the patch is applied, you can practice sports, have a shower,... definitely, follow a normal life, even sunbathing.

The application is much more convenient if performed at night.

□ THE ACTIVE INGREDIENTS

SALICYLIC ACID [0.1%]: Especially useful in the treatment of acne due to its ability to penetrate the follicle. Salicylic acid helps to balance the abnormal desquamation process that occurs in acne skin, removing dead skin cells and helping to keep pores clean. It means that the number of blocked pores and therefore inflammations and are reduced.

GRAPE EXTRACT: thanks to resveratrol, a component contained in grapes and wine, it is possible to inhibit the growth of bacteria that causes acne. Also, its rich antioxidant content gives skin protection against free radicals and subsequent cell damage.

TEA TREE OIL: one of its most important properties is its antibacterial and antiseptic power acting against viruses, bacteria, fungi and yeasts. It has also been proven its anti-inflammatory capacity and high efficiency in dermatological treatments. That disinfecting power and being astringent, it reduces inflammation, infection and dry the blackheads and pimples. Unlike other compounds, tea tree oil does not sweep the natural oils from the skin so keep it balanced.

ROSEMARY: its antiseptic and anti-inflammatory properties are very useful in the treatment of acne as it purifies the pores.

EUCALYPTUS: has strong antiseptic activity that helps reduce acne because it acts against blackheads and festering pimples. It also has antibacterial properties that prevent future breakouts. In addition helps to relieve inflammation and reduce pain associated with boils.

ACNE PATCH

MINT: menthol, mint main component, is a natural substance analgesic and anti-inflammatory, that can fight acne quickly and efficiently.

WINTERGREEN: this plant has analgesic and anti-inflammatory astringent properties allowing disinfect and dry the pores and pimples.

LAVENDER: This is an essential component in cosmetic mixtures due their capacity to increase the synergy between all oils. It also has great capacity to regenerate the skin and is a great moisturizer.

ORANGE BLOSSOM: with high contain in vitamin C, which makes the oil of orange blossom essential on the acne treatment. It is a powerful antioxidant that helps promote healing, growth and repair of skin. It also promotes the production of collagen, which helps create new skin, allowing the skin to regenerate more quickly.
