

## AFTER-BITE PATCH

### PRODUCT DESCRIPTION

**This is a new patch that helps treat insect bites.** The physical barrier provided by the patch isolates the skin affected by the insect bite from external agents, so that, avoiding scratching the bite, the affected skin does not become further infected. The patch contains active substances with moisturizing, soothing and refreshing activity.

#### MAIN BENEFITS:

- Prevents from scratching or protects against rubbing and consequent irritation of the skin
- Alleviates itching sensation
- Relieves discomfort from insect bites
- Provides a protective barrier while keeping contaminants out
- Because of being a transparent patch, it is discreet and comfortable to wear, and it allows the wearer to shower, play sports, etc
- It does not contain AMMONIA, consequently, it is suitable for the whole family, except for children under 3 years old due to the presence of menthol

### THE ACTIVE INGREDIENTS

- **LIQUORICE** Soothing and relaxing, it encourages and accelerates the skin's healing process.
- **BISABOLOL** An active ingredient found in chamomile essential oil. It has anti-inflammatory and healing properties; perfect for protecting the skin.
- **MENTHOL** An active ingredient extracted from mint. It has well known cooling and soothing properties [it also has certain local analgesic action]. It is also an antiseptic and antimicrobial, which reduces bacterial growth.

Therefore, and thanks to the synergistic action of its active ingredients, the **After-bite Patch** effectively and conveniently accelerates the skin's recovery, relieving the unpleasant itching sensation produced after insect or mosquitoes bite.

### INSTRUCTIONS FOR USE

- Apply over the bite and leave it on.
- Recommended use: leave on for 4-8 hours and reapply if deemed appropriate.
