BODY WRAP ABDOMEN REDUCTOR

with Caffeine

PRODUCT DESCRIPTION

Body wrap Abdomen Reductor reduce skin adiposity in the abdominal area and delineate the figure. The main objective achieved is to reduce the abdominal area, leaving it flatter and firmer. This objective is achieved through active plant ingredients.

INDICATIONS

Body wrap abdomen reductor is designed for those who want to achieve a more slender figure by reducing stomach and waist volume.
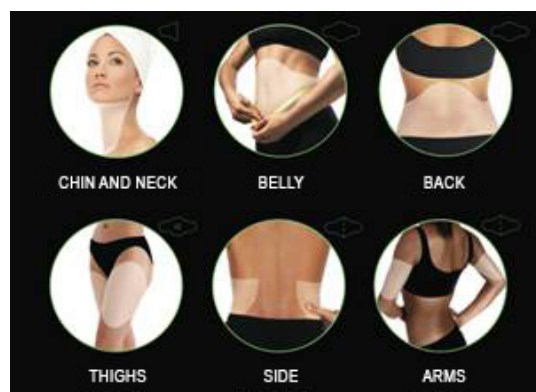

THE ACTIVE INGREDIENTS

Body Wrap abdomen redactor has natural ingredients of proven efficacy in reducing volume (hedera helix extract, hammamelis virginiana extract, fucus vesiculosus, aesculus hippocastanum).

- CAFFEINE stimulates stimulates the activity of lipolytic enzymes. It develops a strong lipo-reducing action, reactivates microcirculation, it has draining properties and it has also a capillary-protective action. The most important biochemical effect of Caffeine consists on inhibiting the phosphodiesterase enzyme that degrades the cyclic adenosine monophosphate.

- SAPONINS, deriving from the other active ingredients present in the product, together with caffeine, perform a protective and draining action.
