

KALO PERMEX PATCH

□ PRODUCT DESCRIPTION

KALO PERMEX is a patch formulated against cellulite imperfections.

This transparent extra-thin patch contains natural substances that are released through an innovative technological dermal device.

□ INDICATIONS

The main objective achieved is helping to attenuate the orange peel and to reduce localized adiposity appearance of the skin and, draining effectiveness.

□ MECHANISM OF ACTION

This is a product formulated with patch technology. It consists of a waterproof film with an adhesive layer containing the dispersed active ingredients. When this adhesive gets in contact with the skin, it gradually releases the active ingredients and achieves sustained effect for 24 hours.

The patch's occlusive action facilitates the entry of the active ingredients through the skin.

□ THE ACTIVE INGREDIENTS

The cosmetic pool of below ingredients exploits a positive action in the managing of body weight in the presence of slow metabolism.

CAFFEINE: An active ingredient used as an anticellulite. Slimming and reduction of local fat and imperfections.

FUCUS VESICULOSUS: An alga with high mineral content and due to iodine, it stimulates lipids metabolism.

CAMELLIA SINENSIS: The methylxanthines contained in it, act by promoting the diuretic action. They also perform protective, antioxidant and thermogenic actions that promote physical tonicity. Draining, antioxidant, metabolism stimulant.

COFFEE ARABICA: The mix of natural actives contained accelerate the metabolism.

SPIREA ULMARIA: It is characterized by its draining effect.

CITRUS AURANTIUM: Stimulating the metabolism of lipids and local fat.

CINNAMOMUM ZEYLANICUM: Antioxidant, stimulating the metabolism of carbohydrates.

TOCOPHERYL ACETATE [Vit. E]: Antioxidant.

COLEUS FORSKOHLII: Stimulating the metabolism, re-equilibration of body weight.

KALO PERMEX PATCH

☐ INSTRUCTIONS FOR USE

Apply the patch to clean, dry skin with no trace of cream in the area to be treated.

Cut the foil sachet and remove one of the films it contains. Separate one of the patches from the support film and stick it on the chosen area of skin.

Use 2 patches per day for the first 28 days and 1 patch per day for the next 28 days. During the period of use of two patches, they should be applied one on the right side and one on the left side of the body, alternating inner and outer thigh. Continue to alternate the areas of application during the use of a single patch.

Leave on for 24 hours, after which the patch will come off easily. Apply a new patch, or two during the first 28 days.

☐ PRESENTATION

The patches are attached to a transparent PET film. This prevents the active part, which goes in contact with the skin, from being exposed and protects it.

28 PATCHES

- 1 blank foil sachet with 28 square patches, 32mm x 32mm, in 4 transparent PET films each containing 7 patches.
- Sachet size: 18cm wide x 10cm high.
- The sachet can be provided blank or printed.

☐ CLINICAL RESULTS

Evaluation of the efficacy of KALO PERMEX Patch in helping to reduce cellulitis imperfections visibility and water retention:

Duration: Product efficacy is evaluated after 28 and 56 days of its daily use.

Instructions for use:

T0-T28 days: Apply two patch every day (one on the right thigh, one on the left thigh, changing everyday position- external or internal thigh), leave the patch on for 24 hours.

T29-T56 days: apply one patch every day (changing everyday right and left side and changing everyday position- external or internal thigh), leave the patch on for 24 hours.

Sample size: 40 women showing cellulitis imperfections and local adiposities.

Results: A significant reduction of the thigh circumference by -1.19 cm^* at T28 and by -1.66 cm^* at T56.

The product was positively judged by majority of the enrolled subjects for all the investigated aspects.

Dermatologically tested.
