

FIRMING LEGS PATCH

□ PRODUCT DESCRIPTION

The product is a patch with firming, toning and refreshing action on the skin of the legs. It is specially designed for those situations when the legs feel fatigued [after a day spent standing up, after a long walk...].

The objective is achieved by active plant ingredients that have firming and toning actions to regenerate the skin and leave it smooth and toned.

The active plant ingredients act on both the epidermis as well as the deeper layers of the skin, leading to a contribution of vitality and overall firming for the skin of the legs.

The release of the active ingredients is sustained and gradual over time, so that constant availability of its beneficial effects is ensured.

□ MECHANISM OF ACTION

This is a product formulated with **Patch Technology**. It consists of a waterproof film with an adhesive layer containing the dispersed active ingredients. When this adhesive gets in contact with the skin, it gradually releases the active ingredients, which penetrate to the dermis, thereby achieving sustained action over 8 hours.

The patch's occlusive action facilitates the entry of the active ingredients through the skin.

□ THE ACTIVE INGREDIENTS

BILBERRY: [Vaccinium myrtillus] Disinfecting action. Contributes to improving the microcirculation and has disinfecting effects. Achieves to improve overall appearance of the skin that reveals less inflamed and more toned.

HORSE CHESTNUT: Vasoprotector. It has a high content of saponins, widely used by its vasoprotector effects that improve the tone of the venous wall. Presents anti-inflammatory and anti-edema effects. The oil makes the skin very soft.

CENTELLA ASIATICA: Regenerator. Widely recognised and used as a tissue regenerator thanks to its stimulating action on fibroblasts. By stimulating the fibroblasts, they increase the production of collagen, elastin and the macromolecules of the dermis, to improve the skin's tone and elasticity.

RUSCUS ACULEATUS: Skin oxygenator. With a protective action on veins and capillaries. This action helps improve micro-circulation, allowing greater oxygenation of the tissues. Improves the skin's overall appearance, the feeling of heaviness and swelling, providing vitality to the legs.

MENTHOL: Provides a cooling sensation to the skin.

FIRMING LEGS PATCH

INSTRUCTIONS FOR USE

- 1) Ensure that the area where the patch (gluteus, legs, thighs) will be applied is clean and dry, to ensure perfect adhesion. Once the patch has been applied, it will remain in place even when showering, sweating or doing other activities.
- 2) Cut the foil sachet and remove one of the films it contains. Separate one of the patches from the support film and stick it on the chosen area of skin.
- 3) Leave on for 8 hours, after this time has elapsed remove the patch and reapply the next day if deemed appropriate.

The effects of the **firming leg patch** are noticeable with each application, consequently, it is recommended to use them whenever necessary, preferably from midday when the feeling of heaviness is more noticeable.

The patch is easily removed. Detach one end and then pull gently. There is no need to rinse or wash the area afterwards.

PRESENTATION

The patches are attached to a transparent PET film. This prevents the active part, which goes in contact with the skin, from being exposed and protects it.

Treatment may be occasional or extended for 15 days.

FIRMING LEG PATCH, 14 PATCHES:
