

TEETHING GEL

Soothes baby's gums

PRODUCT DESCRIPTION

TEETHING GEL is a gentle and safe gel which provides immediate relief to the gums, from the discomfort associated with the appearance of the first baby teeth.

Hypoallergenic. Dermatologically tested.

INDICATIONS

Indicated when **gums are red and inflamed** due to the emergence of baby teeth.

MECHANISM OF ACTION

This gel forms a mucoadhesive film that protects and gives instant gum relief during the emerge of first teeth.

Safe for oral use. Free from sugar and pharmaceutical substances. All ingredients can be ingested.

The product DOES NOT contain local anaesthetics or ingredients of pharmaceutical origin and is FREE of artificial flavours.

INGREDIENTS

The product contains the following active ingredients:

- **XYLITOL** forms a bio adherent film that acts as a protective barrier, lubricating the oral mucosa, and protects newly formed teeth. It helps reduce the incidence of cavities, and soothes sore gums.

- **LIQUORICE EXTRACT.** Glycyrrhizin is the key compound of licorice that helps in preventing and treating oral diseases. It prevents the growth of bacteria such as tooth decay and gum disease and numbs the gums while baby chews.

- **MINT:** inhibits the growth of bacteria in the mouth, helps prevent tooth decay, and gives cooling sensation because of menthol.

- **CHAMOMILLE** is a mild relaxant and also has anti-inflammatory and antiseptic properties. Its derived substance alpha bisabolol, is well known for helping in wound healing and preserving the natural lipid of the skin. Protect newly formed teeth, helps to relieve the symptoms of teething, supports the gums to eliminate unwanted bacteria.

Provides pain and irritability relief. Helps reduce the incidence of cavities.

- **POLYSSACHARIDE POLLULAN** is a water-soluble polysaccharide produced by yeast-like fungus *Aureobasidium pullulans*.

It creates a protective film against plaque-producing gums that cause dental plaque, gingivitis, and bad breath.

- **TRIPOTASSIUM CITRATE** helps to reduce the sensitivity of the teeth.

TEETHING GEL

Soothes baby's gums

INSTRUCTIONS

Apply as necessary to the gums, massaging lightly with the finger. The gel can be kept in the refrigerator to give a cooling effect upon application.

FORMAT

1 tube containing 15 ml of gel.
