

## CBD WOUND GEL

### PRODUCT DESCRIPTION

**CBD WOUND GEL** is used to accelerate wound healing time, cool, and moisturize as well as form a protective layer on the affected area of the body.

**CBD WOUND GEL** forms a mechanical barrier to protect minor abrasions [non-infected], minor burns, and sunburns. The film formation on the skin creates a superficial covering effect on the skin. In the case of sunburn and mild burns, the external moisture retention and the associated cooling is perceived as pleasant.

### ACTIVE INGREDIENTS

**HYALURONIC ACID** forms a viscous, mucoadhesive substance with high moisturizing and lubricating capacity and thus regulates the hydration of the tissues.

**CARBOMER HYDROGEL** forms a film that protects the skin.

Other ingredients:

**CBD (Cannabidiol)** is extracted from hemp plant [Cannabis sativa] improves skin hydration.

### INSTRUCTIONS FOR USE

The gel must be applied and massaged in sufficient quantity on the skin area several times a day as needed.
