

ENERGY PATCH

□ PRODUCT DESCRIPTION

Patches containing vitamins, amino acids and guarana, with the aim of stimulate both mental and physical functions.

□ INDICATIONS

Energy patches have been designed for both mental and physical better performance. They are aimed to those people that need a boost of energy because are passing through a very demanding period at work or studying, like projects or evaluations that imply extra work and intellectual effort. Energy patches also help to improve physical performance and recovery after practising sport.

□ MECHANISM OF ACTION

Patches are a convenient and innovative way of getting active ingredients into the body. The advantages include avoiding first hepatic pass, which can lower the bioavailability; ease of use for people with trouble swallowing; no oral absorption needed, so the availability in blood is almost immediate and gradually released during the 24 hours of application.

□ THE ACTIVE INGREDIENTS

VITAMIN C: present in some fruits, is highly used for its antioxidant properties.

GUARANA: Thanks to its caffeine content, stimulates both mental and physical functions.

TAURINE: an aminoacid that enhances the effects of caffeine.

VITAMIN B12: intervenes in metabolic routes, helping the body to use energy from foods in a more effective way.

FOLIC ACID: has shown to contribute to normal synthesis of amino acids and reduction of tiredness and fatigue.

L-LEUCINE, L-ISOLEUCINE AND L-VALINE: amino acids that intervene in proteic synthesis of muscular tissue. They can be used by muscles in exercitation to obtain energy.
