

DIRECTGIN VAGINAL GEL

PRODUCT DESCRIPTION

DIRECTGIN VAGINAL GEL contributes to a natural recovery of the vagina's bacterial ecosystem. It promotes the creation of a hostile environment against the proliferation of negative bacterial and/or fungus agents, such as *Candida Albicans*, in case of severe symptoms, and it is capable to provide a fresh comfort from any kind of irritations.

DIRECTGIN VAGINAL GEL is indicated for mycotic and/or bacterial vaginal infection; acute candidiasis treatment; dyspareunia; itching and burnings.

ACTIVE INGREDIENTS

HALOBOR (Hyaluronic acid, sodium salt, γ -cyclodextrin, Boric acid) innovative composition which provides targeted action.

- Boric acid 3% to avoid bacterial and /or mycotic infections and to foster the natural PH level of the vaginal environment.
- Hyaluronic acid, sodium salt to hydrate and to recover the vaginal mucosa.
- γ -cyclodextrin to increase active ingredients' bioavailability.

CALENDULA OFFICINALIS FLOWER EXTRACT Carotenes, flavonoids and essential oils protect the skin against external aggressions.

ALOE VERA soothing action.

D-PANTHENOL soothing action.
