

## FLUID, GEL & SPRAY TO PROTECT ORAL MUCOSA

### PRODUCT DESCRIPTION

**FLUID, GEL & SPRAY TO PROTECT ORAL MUCOSA** is a complete treatment of canker sores and ulcer lesions with 4 references: a targeted action, an extensive covering, a mouthwash and a junior flavoured.

Its filmogenic properties and the content in Hyaluronic acid, the formulation covers the irritated part of the mucosa ensuring protection and encouraging natural healing. Also, it isolated the affected area from mechanical and chemical stress [rubbing, saliva, drinks, etc.], relieving pain and burning sensations.

### INDICATIONS

**FLUID, GEL & SPRAY TO PROTECT ORAL MUCOSA** adjuvant treatment for canker sores and ulcer lesions, for daily prevention and treatment. It is also indicated in case of aphthous stomatitis, small mouth lesions such as those due to contact with orthodontic appliances, fixed and mobile prostheses.

### ACTIVE INGREDIENTS

**HYALURONIC ACID** moisturizing agent, it maintains the correct tissue hydration, playing an essential role in tissue repair processes.

**VEROCHIC® [SHIKIMIC ACID] [patented]**: patented natural compound with antioxidant properties and able to keep the microenvironment of the lesion under control. It can inhibit the proliferation of pathogenic microorganisms responsible of Aphthae and Stomatitis without affecting the beneficial bacteria.

**ALOE VERA** with soothing and moisturizing properties.

**RED ALGA GEL** pacific red algae extract able to restore skin natural water content by exerting a film-forming effect.

### INSTRUCTIONS FOR USE

**Afta Mouthwash**: Rinse the mouth with 10 ml of product for at least 30 seconds 2/3 times a day, or more as needed. The product is ready to use, do not dilute.

**Afta Oral gel**: Apply one or two drops of gel 2-4 times a day, completely covering the lesion.

**Afta Oral spray**: Use 3 or 4 times a day, directing the applicator towards the lesions and spraying 3 times or as needed to form the protective film.
