

## CLEAR SPOT HYDROGEL PATCH

Anti-aging spot patch to reduce pigmentation due to aging

### □ PRODUCT DESCRIPTION

**CLEAR SPOT HYDROGEL PATCH** is hydro-matrix type patch gives refreshing and soothing effect. The combination ingredients loaded in hydrogel patch enhances whitening skin and reduces pigmentation on the dark spots [facial areas, hands, back, shoulders]. Long lasting moisturizing effect [12 h].

The aging spot in the skin can be generated by UV radiation. When the skin is exposed in UV radiation, melanin cells are stimulated in the skin. The melanin pigmentation changes the colour of skin to black spot.

Clinical studies

After 10 days of product use, melanin concentration decreases significantly.

### □ INDICATIONS

It contributes to reduce pigmentation and whitening skin and skin repair effect.
