

VITAMIN D₃ ODF [Cholecalciferol]

Oral Dissolvable Film

PRODUCT DESCRIPTION

VITAMIN D₃ ODF is a thin polymer film embedded with Vitamin D₃ that melts and dissolves quickly and completely in the saliva of the oral cavity.

ODF technology offers additional advantages such as fast drug absorption, no need of water, ease of use when travelling or at work and for persons with restricted water intake.

INDICATIONS

VITAMIN D₃ ODF is indicated in the prevention and treatment of vitamin D deficiency.

Dietary intake of Vitamin D₃ contributes to the normal development of bones and teeth, and to the maintenance of correct muscle function. Also, Vitamin D₃ supports the correct function of the immune system and healthy inflammatory response.

THE ACTIVE INGREDIENTS

VITAMIN D₃ is a vitamin that facilitates the digestive absorption of calcium contained in the diet and also participates in bone formation and restoration.

Dosage: Each ODF can contain from 400 UI to 2000 UI of vitamin D₃.

INSTRUCTIONS FOR USE

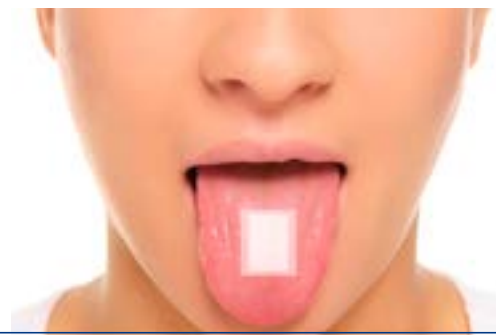

- Open the aluminum sachet, take the ODF and put it over the tongue.
- ODF immediately dissolves. It does not require the use of water since the film dissolves immediately in contact with saliva.

WARNINGS

It is a food supplement. It does not contain: gluten, milk derivatives, lactose, added sugars, added preservatives, artificial colouring agents, artificial aromas, OGM. Keep out of reach of children. Do not exceed the advised daily dosage. It is not advised the use of the product during pregnancy and breastfeeding. Food supplements are not intended to substitute a varied diet and a healthy life style. Keep the product in a cool, dry place, away from direct sunlight.
