DIRECT CALM is an oral gel based on Sodium Alginate, Sodium bicarbonate and Calcium Carbonate. It is useful for those patients that occasionally suffer symptoms linked to the gastroesophageal reflux disease. Treatment of MILD GERD. For patients who experience mild symptoms once or twice a month. Ready to use. Barrier effect. Suitable for children. Lime and cola flavour.

DIRECT SOD is an oral emulsion based on low molecular weight Hyaluronic acid, Sodium alginate, Myrrh extract and simethicone. It is useful for those patients that chronically suffer symptoms linked to the gastroesophageal reflux disease. Treatment of SEVERE GERD. For patients who experience mild symptoms once or twice a month. Ready to use. Barrier effect. Suitable for children. Vanilla biscuit flavour.

□ ACTIVE INGREDIENTS

HYALURONIC ACID [HA] ^[1,3] forms a viscous, mucoadhesive substance with high moisturizing and lubricating capacity and thus regulates the hydration of the tissues. Activation of fibroblasts, macrophages, and tissue repair. It supports the process of reconstruction of the damaged epithelium.

MYRRH EXTRACT ^[1,2] soothes the laryngeal mucous membranes inflamed.

MAGNESIUM ALGINATE ^[1] acts as a physical barrier for GERD by forming a gel that floats on top of stomach contents to prevent acid reflux.

SODIUM ALGINATE ^[2,3] creates a viscous barrier capable of preventing the contents of the stomach from rising towards the oesophagus.

SIMETHICONE ^[3] targeted action against reflux gas.
